## Key Risks

**Capital loss risk:** It is important to remember that the value of investments and any income from them can go down as well as up and is not guaranteed.

**Equity risk:** Funds that invest in securities listed on a stock exchange or market could be affected by general changes in the stock market. The value of investments can go down as well as up due to equity markets movements.

**Discretionary management risk:** Discretionary management is based on anticipating the evolution of different markets and securities. There is a risk that the fund will not be invested at any time in the most efficient markets and securities.

**Foreign Exchange risk:** Where overseas investments are held, the rate of exchange of the currency may cause the value to go down as well as up. Variations in exchange rates between currencies can have a significant impact on the performance of the products presented.

**Small & Mid cap risk:** Please note that the fund is invested in securities issued by companies which, due to their small or mid market capitalization, are less liquid and may present higher risks.

# Important Information

**The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may also cause the value of such investments to fluctuate. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. Any performance information shown refers to the past and should not be seen as an indication of future returns.**
